

Large Numbers

Menu

sandwich 80¢

juice 61¢

chips 33¢

apple 14¢

What can I buy?

Money Amounts

NCTM Standards 1, 2, 4, 6, 7, 9, 10

© Education Development Center, Inc.

The worksheet is divided into four sections by a vertical purple line. Each section contains a set of coins and a box for the amount, followed by a circle for comparison.

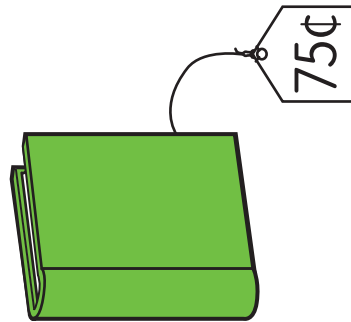

- Top Left:** Two 2006 quarters. Box: . Circle:
- Top Right:** Two 2006 quarters and two 2006 pennies. Box: . Circle:
- Bottom Left:** One 2006 dime and three 2006 pennies. Box: . Circle:
- Bottom Right:** One 2006 dime and three 2006 pennies. Box: . Circle:

Count to find out how much money. Then write $>$, $<$, or $=$.

NOTE: Your child is learning to compare money. Have your child practice finding the values of collections of pennies, nickels, and dimes.

What could you buy with 43¢?

Circle what you can buy with 43¢ or less. Try to buy more than one item.

Numbers That End in Zero

NCTM Standards 1, 2, 7, 9, 10

$30 <$

 < 40

 $30 <$

 < 40

$< 51 < 60$

 $50 <$

 < 60

Write the missing numbers.
Complete the comparison sentences.

NOTE: Your child is learning about larger numbers. Say a number between 50 and 100. Ask your child to name the closest number that ends in zero.

$$20 < 27 < \square$$

$$\square < 28 < 0$$

$$0 < 28 < 0$$

$$0 < 13 < \square$$

$$\square < 94 < \square$$

$$0 < 94 < \square$$

$$0 < 62 < \square$$

$$\square < 5 < 0$$

$$0 < 5 < 0$$

Write the missing numbers.

Use the number line to help you complete each comparison sentence.

Comparing and Ordering Numbers

NCTM Standards 1, 2, 6, 7, 8, 9, 10

Two-Digit Numbers I Can Make From

3

1

5

Write all of the two-digit numbers you can make with 3, 1, and 5. Circle the largest number. Use each digit only once in a number.

NOTE: Your child is learning to compare and order numbers. Have your child order the numbers from smallest to largest.

35 51 13 53 31 15

smallest

largest

Write the numbers from smallest to largest.

A Quarter and a Dollar

NCTM Standards 1, 2, 4, 6, 7, 8, 9, 10

A  is 100¢.

A  is .

A  is .

Color coins to equal one dollar. Write how many coins it takes.

NOTE: Your child is learning coin equivalencies for one dollar. Help your child practice counting groups of coins that include quarters.

A

is

.

=

There are

in coins.

Color and write the number of quarters equal to one dollar.

Write the number of quarters equal to two dollars.

Circle quarters to make dollars. Write how many dollars.

Introducing the Calculator

NCTM Standards 1, 6, 7, 8, 9, 10

Grandpa is 63 years older than my sister.
My sister is 12 years old.

Grandpa is years old.

 =

Use a calculator to find Grandpa's age. Complete the number sentence to show your work.

NOTE: Your child is learning about a calculator. Help your child add basic numbers on a calculator, such as $3 + 4$, and check the answer together.

Grandma is 70 years old.
Genya is 61 years younger
than Grandma.

Genya is years old.

$$70 - \text{---} = \text{---}$$

$$12 \text{ } \bigcirc \text{ } 18 = 30$$

$$42 \text{ } \bigcirc \text{ } 16 = 26$$

$$15 = 5 \text{ } \bigcirc \text{ } \square$$

Use a calculator to find Genya's age. Complete the number sentence.
 Complete each number sentence. Use a calculator to check.

Using a Calculator

NCTM Standards 1, 6, 7, 8, 9, 10

There are 77 girls in our school.
This is 10 more than the number
of boys.

There are boys.

$$\boxed{77} \ominus \boxed{\quad} = \boxed{\quad}$$

Use a calculator to solve the problem. Complete the number sentence to show your work.

NOTE: Your child is learning to use a calculator to solve problems. Make up a problem like the one on this page for your child to solve.

There are only 29 boys on the playground. This is 15 less than the numbers of girls.

There are girls.

$$\boxed{29} \oplus \boxed{\quad} = \boxed{\quad}$$

$$6 \bigcirc 22 = 28$$

$$49 \bigcirc \boxed{\quad} = 20$$

Use a calculator to solve the problem and to complete the number sentences.

Write the missing signs and number.

270 two hundred seventy

Exploring Rules

NCTM Standards 1, 2, 6, 7, 8, 10

in	out
1	2
8	
12	
4	12
15	

Find the rule for the In-Out machine. Complete the table.

NOTE: Ask your child to explain the rule for this In-Out machine and how he or she found the missing numbers in the table.

in	→	out
2		1
4		3
5		4
10		
14		
31		

in	→	out
0		3
1		4
2		
5		8
		10
		20

Find the rule for each In-Out table. Complete each table.

Using Estimation

NCTM Standards 1, 4, 9, 10

Number	Closer To
 13	<input checked="" type="radio"/> 10 or <input type="radio"/> 20
 39	<input type="radio"/> 30 or <input type="radio"/> 40
 72	<input type="radio"/> 70 or <input type="radio"/> 80
 26	<input type="radio"/> 20 or <input type="radio"/> 30
 17	<input type="radio"/> 10 or <input type="radio"/> 20

Circle the closer number.

**NOTE:** Your child is learning to round numbers to the closest 10. Ask your child to explain the answer for each problem.

Write the value of each collection of coins.
 Write how many of each coin will equal 100¢.

Shopping

NCTM Standards 1, 2, 4, 6, 7, 8, 9, 10

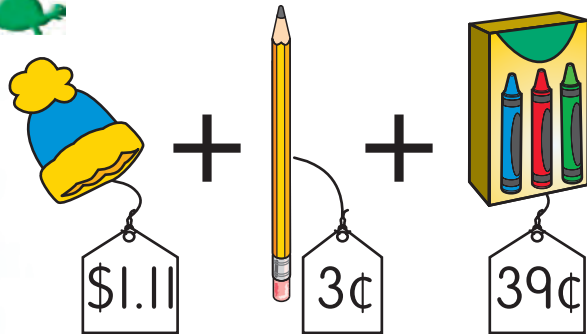

Sally has

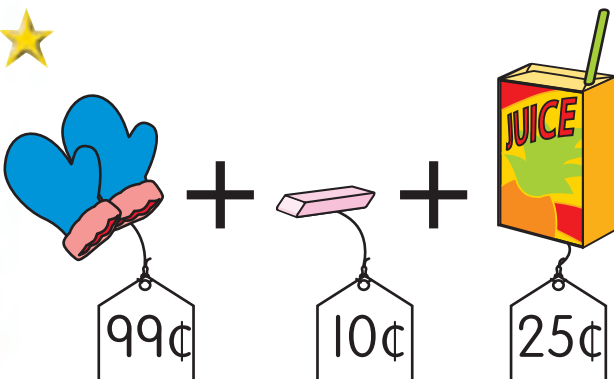

Things Sally Can Buy

Yes No

Yes No

Yes No

Find the value of the money. Then circle Yes or No to tell if there is enough money to buy the items.

NOTE: Help your child practice finding the value of a dollar and some coins. Use a calculator if needed. Remind your child that one dollar is 100 cents.

Make a Dollar

If you have

Then you need

Find the number of coins needed to equal one dollar.

Using Addition and Subtraction

NCTM Standards 1, 2, 4, 6, 7, 8, 9, 10

Deb has 45  . Nina has 35  .

Who has more? _____

45  ○ 35 

Rusty has as many  as Deb and Nina.

How many  does Rusty have?

Rusty has   .

-  Solve the problem. Write $>$, $<$, or $=$.
-  Solve the problem. Complete the number sentence.

NOTE: Your child is learning to solve word problems. Ask your child to explain how the number sentence relates to the problem.

Won has 86

Jay has 23

Who has more? _____

86

23

Nina gave Won and Jay each 10

Now who has more?

How much do Won and Jay have together now?

Solve each problem.

Large Numbers in Measurements

NCTM Standards 1, 2, 4, 6, 7, 8, 9, 10

Which house has the longest fence?

or

or

How long are the 3 fences altogether?

- Circle the house with the longest fence.
- Write a number sentence to find the total length of all three fences.

NOTE: Help your child measure the length of a hallway or driveway using a shoe or hand as a unit of measurement.

Use the paper clips at the top of the page to find the length of each crayon. Complete each number sentence.

3 + [] = []

[] + [] = []

[] - [] = []

Use the paper clips at the top of the page to find the length of each crayon. Complete each number sentence.

Reasonable Estimates

NCTM Standards 1, 6, 7, 8, 9

Guess	<input type="text"/>	chairs
--------------	----------------------	---------------

Guess	<input type="text"/>	chairs
--------------	----------------------	---------------

Guess the number of chairs in each room shown.
Explain how you came up with your guess.

 **NOTE:** Your child is learning to estimate. Help your child estimate the number of something in your home, such as books in a bookcase.

Guess	<input style="width: 50px; height: 50px; border: 1px solid black;" type="text"/>	seats
--------------	--	--------------

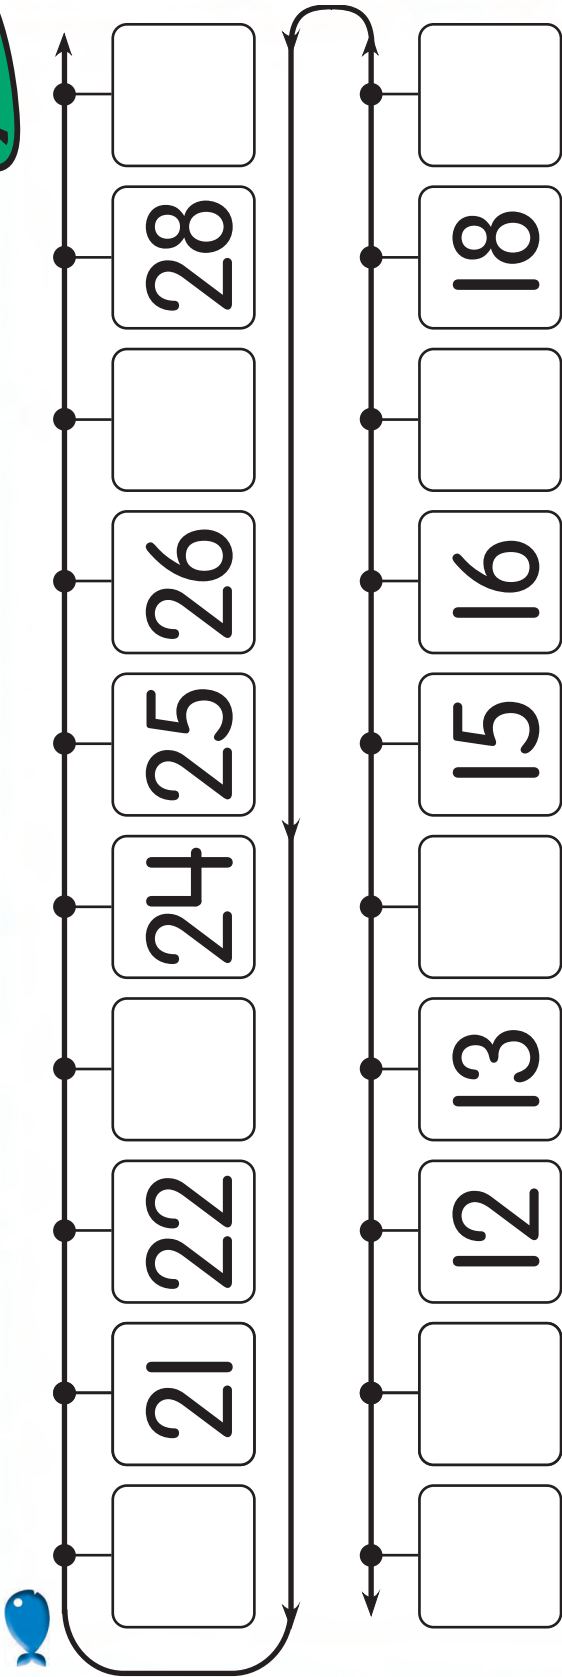

Guess	<input style="width: 50px; height: 50px; border: 1px solid black;" type="text"/>	seats
--------------	--	--------------

Guess the number of seats in each picture.
Explain how you made your guess.

282 two hundred eighty-two

Using Comparison as an Estimation Strategy

NCTM Standards 1, 6, 7, 10

$$10 < \boxed{3} < 20$$

$$20 < \boxed{7} < 30$$

$$10 < \boxed{5} < 20$$

$$20 < \boxed{} < 30$$

- Write the missing numbers.
- Use the number lines to complete comparisons.

NOTE: Help your child practice identifying numbers between multiples of ten. For example, one of the numbers between 20 and 30 is 24.

$$100 < 105 < 100 < 109 < 110$$

$$100 < 105 < 100 < 109 < 110$$

$$100 < 105 < 100 < 109 < 110$$

$$100 < 105 < 100 < 109 < 110$$

$$200 < 205 < 200 < 209 < 210$$

$$200 < 205 < 200 < 209 < 210$$

$$200 < 205 < 200 < 209 < 210$$

$$200 < 205 < 200 < 209 < 210$$

Complete each number line. Then use the number lines to complete each comparison.

How Many Marbles?

NCTM Standards 1, 2, 6, 7, 8, 9, 10

© Education Development Center, Inc.

A

B

C

F

E

D

Jar							
Marbles	14	26	64	98	206	384	

Compare the number of marbles in each of the jars. Write the letter of the jar to match each amount.

NOTE: Ask your child to explain one possible way to estimate the number of marbles in each jar.

Jar	G	H	I	J	K	L
Beans	28	17	55	12	31	6

least

most

+

+

+

+

+

=

total

Write the letters of the jars to order them from least to most beans. Then write the number sentence and use a calculator to find the total.

286 two hundred eighty-six

Review/Assessment

NCTM Standards 1, 2, 5, 7, 9, 10

Find the value of each group of coins. Then write $>$, $<$, or $=$ to compare.

NOTE: This page assesses your child's understanding of skills and concepts from the chapter.

in	3	4	12	7	14
out	5	6	14		

in	2	11	8	15	32
out	1	10	7		

Number

Closer To

64

60 or 70

49

40 or 50

87

80 or 90

Write the missing numbers.

★ Circle the number that is closest to the first number in each row.
