

Name _____

Exploring Addition and Subtraction

Add in Any Order 

You need

- 10 counters
- 2 paper plates

Put some counters on each plate.

STEP 1 Counting

How many counters are on the left plate? _____

How many counters are on the right plate? _____

STEP 2 Finding the Total

How many counters are there in all? _____

Explain how you found the total.

STEP 3 Adding in Another Order

Switch the plates so that the left one is on the right.

How many counters are there in all now? _____

How does this compare to the answer in Step 2?

Why do you think the totals are the same?

Investigation

School-Home Connection

Dear Family,

Today we started Chapter 4 of *Think Math!* In this chapter, I will use stories and puzzles to learn about addition and subtraction. There are NOTES on the Lesson Activity Book pages to explain what I am learning every day.

Here are some activities for us to do together at home. These activities will help me learn to add and subtract.

Love,

Family Fun

Missing Number

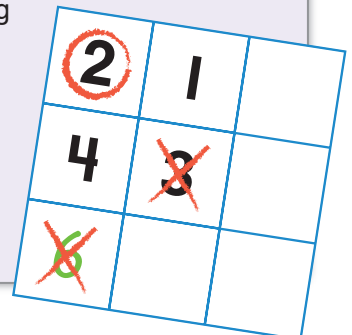

Work with your child to identify a missing number of items.

- Two players need exactly 10 paper clips or other small objects for this game. Set the 10 objects on a table.
- One player hides some of the 10 objects in his or her hand and challenges the other player to tell how many objects are hidden.
- By counting the number of objects left, the player determines the number of hidden objects.
- If the number is correct, that player scores 1 point.
- Players take turns. The first player to get 10 points wins!

Tic-Tac-Add

Work with your child to add two numbers.

- Draw a tic-tac-toe board with the numbers 1, 2, 3, and 4 in the four squares of the top left corner.
- Assign your child to be X and to go first. Players take turns and follow the rules of tic-tac-toe with one modification: if a player wants to mark a square without a number, he or she must add the two numbers in the row, column, or diagonal and write the sum on the game board first before marking an X or O.
- Play continues until one player makes tic-tac-toe or the game ends in a tie. Players can play again by marking the upper left squares of a new board with the numbers 2, 3, 4, 5; 1, 1, 2, 4; or 2, 2, 4, 5 or any other combination of four numbers less than 5.

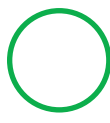

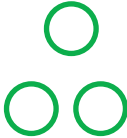

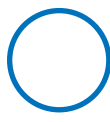

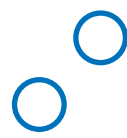

Introducing the Cross Number Puzzle

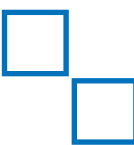

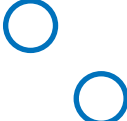

NCTM Standards 1, 2, 3, 6, 8, 9, 10

What numbers are missing?

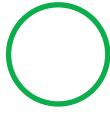

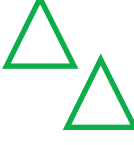

1.

	LARGE	small		LARGE	small
Green			→		3
Blue					

2.

					
LARGE			→		
small					

3.

	LARGE	small		LARGE	small
			→		
					

NOTE: Your child is learning to sort shapes, count them, and record the numbers in a table. This prepares children for exploring addition and subtraction in later lessons.

4. What numbers are missing?

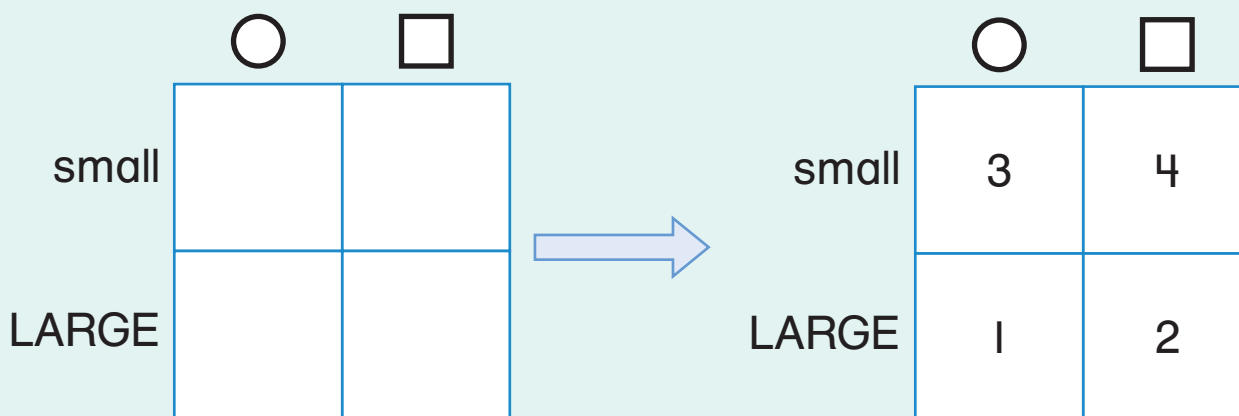

5. Make your own.

Challenge

6. What figures are missing?

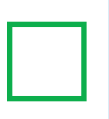

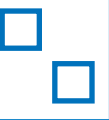

Using Cross Number Puzzles to Add

NCTM Standards 1, 2, 3, 6, 8, 9, 10

Complete each puzzle.

1.

○ □

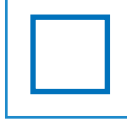

Green		
Blue		

→

2	1	3
3		

2.

LARGE small

△		
□		

→

3.

Blue Green

LARGE		
small		

→

NOTE: Your child is learning to count objects in a grid and to record the numbers in a Cross Number Puzzle. In these puzzles, sums of objects in rows and columns are recorded in the bottom row and in the right column.

4. What are the missing numbers?

	L	T	
Green	L L L	T T	
Blue	L L L L L	T T T	

→

3		

5. What are the missing letters and sums?

	Green	Blue	
M			
W			

→

4	2	
3	0	

Challenge

6. What are the missing numbers and shapes?

	Green	Blue	
○			
□			

→

3	2	
	4	6

Exploring Missing Addends

NCTM Standards 1, 2, 6, 7, 8, 9, 10

Fill in the missing pictures and numbers.

Use the numbers in the puzzles to decide how many to draw.

1.

2.

3.

NOTE: Your child is using reasoning skills to complete Cross Number Puzzles. The numbers in the puzzle match the number of circles in the 2-by-2 grid. Ask your child to explain how to solve each puzzle.

What are the missing numbers?

4.

1	2	3
0		2
1		

$$\boxed{1} + 2 = 3$$

$$0 + \boxed{} = 2$$

$\boxed{1}$	2
+ 0	+ $\boxed{}$
<hr/>	<hr/>
1	$\boxed{}$

5.

3		7
	1	
4		

$$3 + \boxed{} = 7$$

$$\boxed{} + 1 = \boxed{}$$

3	$\boxed{}$
+ $\boxed{}$	+ 1
<hr/>	<hr/>
4	$\boxed{}$

Problem Solving

6. Trey has 9 pieces of fruit. How many of each kind does he have?

red grapes _____ green grapes _____

red apples _____ green apples _____

	red	green
grapes	$\boxed{}$	$\boxed{}$
apples	$\boxed{}$	1
	3	9

Practice with Cross Number Puzzles

NCTM Standards 1, 2, 6, 7, 8, 9, 10

What numbers are missing?

1.

2.

3.

NOTE: Completing the Cross Number Puzzles on these pages helps your child develop problem solving skills.

What numbers are missing?

4.

2	1	3
3		6

5.

		4
1		
2	5	

6.

	3	5
	4	10

7.

0		2
3		11

Challenge

8. Jill made her own Cross Number Puzzle. How can you complete it?

		3
	4	
5		

Sums of 10

NCTM Standards 1, 2, 6, 8, 9, 10

I. Which are sums of 10?

Circle them
as fast as you can.

Sums of 10 Search

$3 + 7$	$3 + 8$	$2 + 8$
$4 + 7$	$10 + 0$	$10 + 1$
$4 + 6$	$9 + 0$	$1 + 9$
$5 + 6$	$8 + 2$	$8 + 3$
$5 + 5$	$7 + 3$	$9 + 1$
$6 + 4$	$7 + 4$	$8 + 4$
$6 + 3$	$3 + 6$	$0 + 10$

NOTE: Your child is learning to quickly recognize pairs of numbers with a sum of 10. On page 70, children use Cross Number Puzzles to see that numbers can be added in any order and still have the same sum.

Complete each puzzle. Use the puzzle to complete the number sentence.

2.

0	1	1
0	9	
0	10	10

$$0 + 10 = 1 + \underline{\quad}$$

3.

	2	2
	8	10

$$\underline{\quad} + 8 = 2 + \underline{\quad}$$

4.

1		
	2	
4		10

$$4 + \underline{\quad} = \underline{\quad} + \underline{\quad}$$

5.

		3
	5	
4		10

$$4 + \underline{\quad} = 3 + \underline{\quad}$$

Challenge

6. Make a puzzle for this picture.

Blue

Green

Addition Stories

NCTM Standards 1, 2, 6, 7, 8, 9, 10

**Solve each problem.**

1. 5 children played tag.
2 more joined the game.
How many children are playing tag now?

_____ children

Use words,
numbers, or pictures
to show how you
solved it.

2. Some children are in the classroom.
6 are boys.
3 are girls.
How many children are in the classroom?

_____ children

NOTE: Your child is learning to solve addition story problems. You may wish to pose an addition problem about objects or people in your house and ask your child to solve it.

 Write an addition story about the kittens.

3. _____

4. Solve your story problem. Use words, numbers, or pictures to show how you solved it.

Subtraction Stories

NCTM Standards 1, 6, 7, 8, 9, 10

**Solve each problem.**

1. 7 children played tag.
2 went home.
How many children are playing now?

_____ children

Use words,
numbers, or pictures
to show how you
solved it.

-
2. 9 children are in the classroom.
6 are boys.
How many are girls?

_____ girls

**NOTE:** Your child is learning to solve subtraction story problems.

You may wish to ask your child to compare two groups of objects in your house. For example, how many more apples do we have than bananas?

Write a subtraction story about the puppies.

3. _____

4. Solve your story problem. Use words, numbers, or pictures to show how you solved it.

Problem Solving Strategy

Guess and Check

NCTM Standards 1, 2, 6, 7, 8, 9, 10

1. There are 6 birds in a tree.
Some are robins and the rest are sparrows.
There are 2 more sparrows than robins.
How many robins are in the tree?

_____ robins

2. Paul has 7 coins in his pocket.
He only has nickels and pennies.
The coins are worth 15¢.
How many of each type of coin does Paul have?

_____ nickels

_____ pennies

3. Reyna sorts 8 triangles by size.
She has the same number of large
triangles as small triangles.
How many of each size does Reyna have?

_____ small triangles

_____ large triangles

NOTE: Your child is exploring different ways to solve problems. Sometimes guessing and checking is an efficient way to solve a problem.

Problem Solving Test Prep

1. Justin made a pattern with figures.

Which figure is missing?

- (A) 
- (B) 
- (C) 
- (D) 

2. Deandre had 1 nickel and 3 pennies. Then he earned 10¢. How much money does he have now?

- (A) 10¢
- (B) 15¢
- (C) 18¢
- (D) 23¢

Show What You Know

3. Fiona has some nickels and pennies. She has 11¢ in all. How many of each type of coin could she have?

_____ nickels

_____ pennies

Explain how you know your answer makes sense.

4. Kelly, Josh, and May are in line. Kelly is in front of Josh. May is right behind Kelly. Who is first?

_____ is first.

Explain how you know your answer is correct.

Chapter 4

Review/Assessment

NCTM Standards 1, 2, 5, 6, 7, 8, 9, 10

1. What figures are missing? Lesson 1
 What numbers are missing?

	LARGE	small
△	△	
□		□ □ □ □

➔

	LARGE	small
△		3
□	1	

2. What numbers are missing? Lesson 2

	B	D
Blue	B B B	D D D
Green	B B	D

➔

3. What numbers are missing? Lesson 3

	3	7
2		
		9

	+	3	=	7
2	+		=	2

		3
+ 2	+	

What numbers are missing? Lessons 4 and 5

4.

		5
	4	
	7	9

5.

3		8
5		10

Solve each problem. Lessons 6 and 7

6. Marcy picked 4 tulips.
Her mother gave her 5 roses.
How many flowers does Marcy
have now?

_____ flowers

7. There are 10 boys in the park.
Four are on the playground.
The rest are on the grass.
How many are on the grass?

_____ boys

Problem Solving Lesson 8

8. Mark sees some frogs and turtles.
He sees 5 animals in all.
There is 1 more frog than there are turtles.
How many of each kind of animal
does Mark see?

_____ frogs

_____ turtles
